

PHASE 4

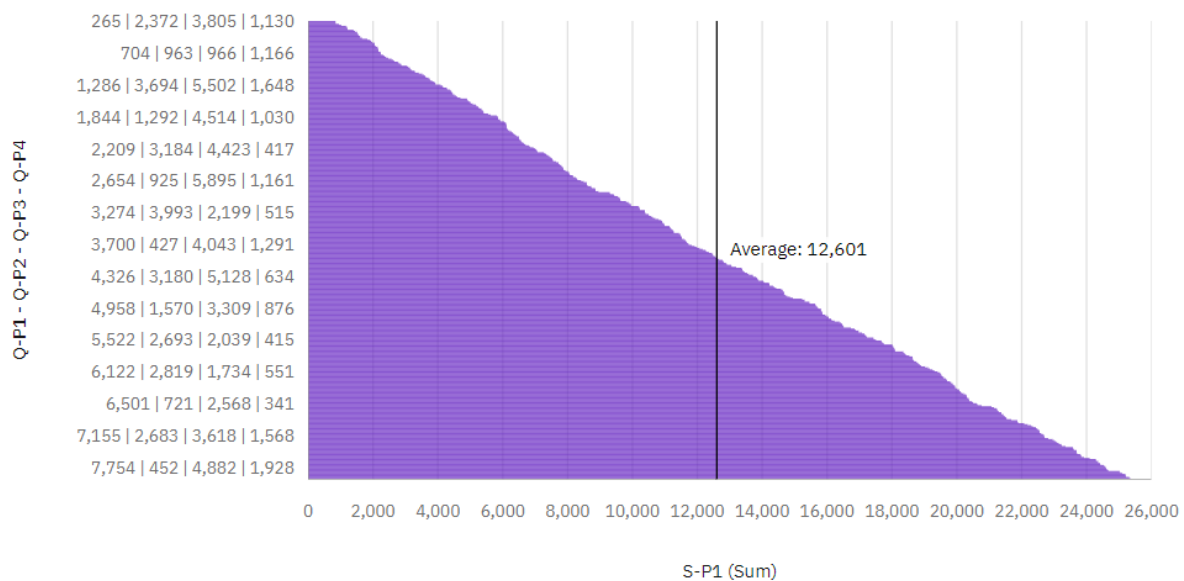

Dataset : <https://www.kaggle.com/datasets/ksabishek/product-sales-data>

1. Continue building the analysis by creating visualizations using IBM Cognos and generating actionable insights.
2. Use IBM Cognos to design interactive dashboards and reports that display insights such as top-selling products, sales trends, and customer preferences.
3. Derive insights from the visualizations, such as identifying products with the highest sales, peak sales periods, and customer preferences for specific products.

- Q-P4 1142 has the highest total S-P1 due to Q-P1 7759.

- Q-P1 6404 has the highest Total S-P4 but is ranked #3 in Total S-P1.
- Q-P3 579 has the highest Total S-P4 but is ranked #2 in Total S-P1.
- Q-P1 6404 has the highest Total S-P4 but is ranked #3 in Total S-P1.
- Q-P3 579 has the highest Total S-P4 but is ranked #2 in Total S-P1.
- Q-P2 3267 has the highest Total S-P1 but is ranked #2 in Total S-P4.
- Q-P3 1834 has the highest Total S-P1 but is ranked #2 in Total S-P4.
- Q-P1 7681 has the highest Total S-P1 but is ranked #38 in Total S-P4.
- Q-P2 1574 has the highest Total S-P4 but is ranked #8 in Total S-P1.
- Q-P4 1851 has the highest Total S-P4 but is ranked #9 in Total S-P1.
- 7681 S-P1 at nearly 49 thousand is 73% higher than the S-P4 of over 13 thousand.
- 3267 S-P1 at almost 54 thousand is 46% higher than the S-P4 of over 29 thousand.
- 1834 S-P1 at over 48 thousand is 41% higher than the S-P4 of over 28 thousand.
- 1142 S-P1 at over 59 thousand is 59% higher than the S-P4 of over 24 thousand.
- S-P1 and S-P4 diverged the most when Q-P1 is 7681, and when S-P1 was over 35 thousand higher than the S-P4.
- S-P1 and S-P4 diverged the most when Q-P2 is 1241, and when S-P1 was over 32 thousand higher than the S-P4.
- S-P1 and S-P4 diverged the most when Q-P3 is 1226, and when S-P1 was almost 24 thousand higher than the S-P4.
- S-P1 and S-P4 diverged the most when Q-P4 is 551, and when S-P1 was over 45 thousand higher than the S-P4.
- Q-P1 7681 has the highest S-P1 at nearly 49 thousand, out of which Q-P4 742 contributed the most at over 24 thousand.
- 1165 has a S-P1 of over 25 thousand for Q-P1 7994.
- S-P1 ranges from 840, when Q-P1 - Q-P2 - Q-P3 - Q-P4 is 265|2372|3805|1130, to over 25 thousand, when Q-P1 - Q-P2 - Q-P3 - Q-P4 is 7994|3128|1262|1165.
- For S-P1, the most significant values of Q-P1 - Q-P2 - Q-P3 - Q-P4 are 7994|3128|1262|1165, 7982|401|1226|251, 7951|2658|5246|1989, 7950|495|1195|908, and 7948|560|387|1850, whose respective S-P1 values add up to over 126 thousand, or 2.2 % of the total.

Peak Sale Periods:

Insights:

- S-P1 ranges from 890.8, when Date is 01-01-2011, to over 25 thousand, when Date is 07-08-2011.
- S-P2 ranges from over 8500, when Date is 01-01-2014, to over 25 thousand, when Date is 01-01-2011.
- S-P3 ranges from over nine thousand, when Date is 07-08-2012, to over 28 thousand, when Date is 07-08-2013.
- S-P4 ranges from over 2500, when Date is 01-01-2016, to over 13 thousand, when Date is 07-08-2012.
- The total number of results for S-P1, across all dates, is 10.
- The total number of results for S-P2, across all dates, is 10.
- The total number of results for S-P3, across all dates, is 10.
- The total number of results for S-P4, across all dates, is 10
- Across all dates, the average of S-P1 is over twelve thousand.
- Across all dates, the average of S-P2 is over seventeen thousand.
- Across all dates, the average of S-P3 is over eighteen thousand.
- Over all dates, the average of S-P4 is nearly nine thousand.

Customer Preferences :

+Stacked bar chart

- A stacked bar chart representing customer preferences that can help us to visualize how different product units are preferred by customers. Here's an explanation of what it might look like:
 - ✓ **X-Axis:** The X-axis of the stacked bar chart represents different time periods or categories. For example, it could represent dates or specific time intervals.
 - ✓ **Y-Axis:** The Y-axis represents the total revenue or the number of units sold. It shows the quantitative value being measured.
 - ✓ **Stacked Bars:** The chart consists of stacked bars, each representing a specific time period (e.g., date) on the X-axis. Each bar is divided into segments, with each segment representing a different product unit (unit1, unit2, unit3, unit4).
 - ✓ **Color-Coding:** Each segment within a stacked bar is color-coded to differentiate the product units. Customers' preferences for specific units are visualized by the distribution of colors within each bar.

- Q-P1 7910 has the highest Total S-P1 but is ranked #83 in Total S-P4.

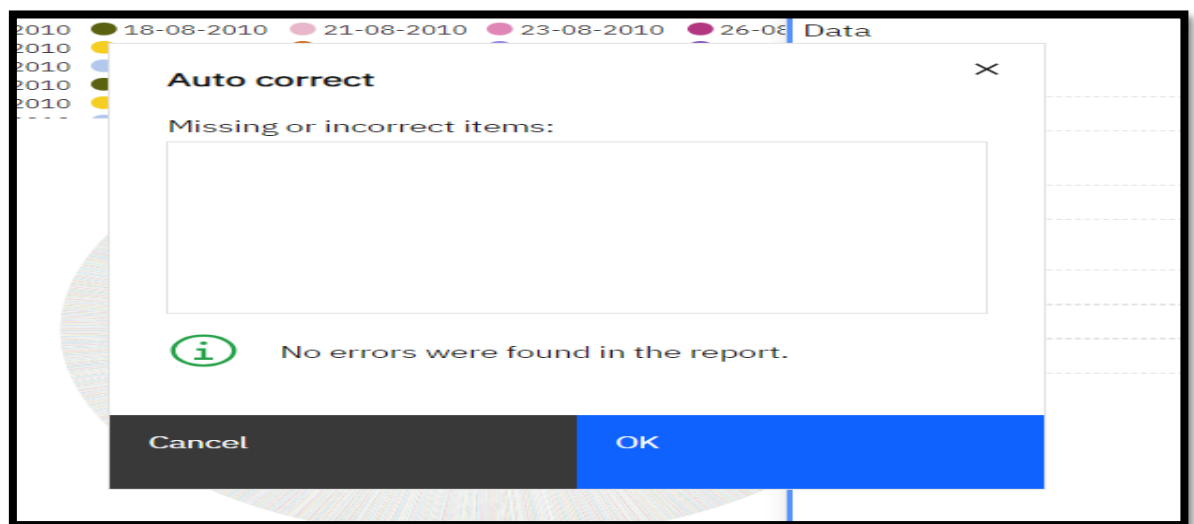

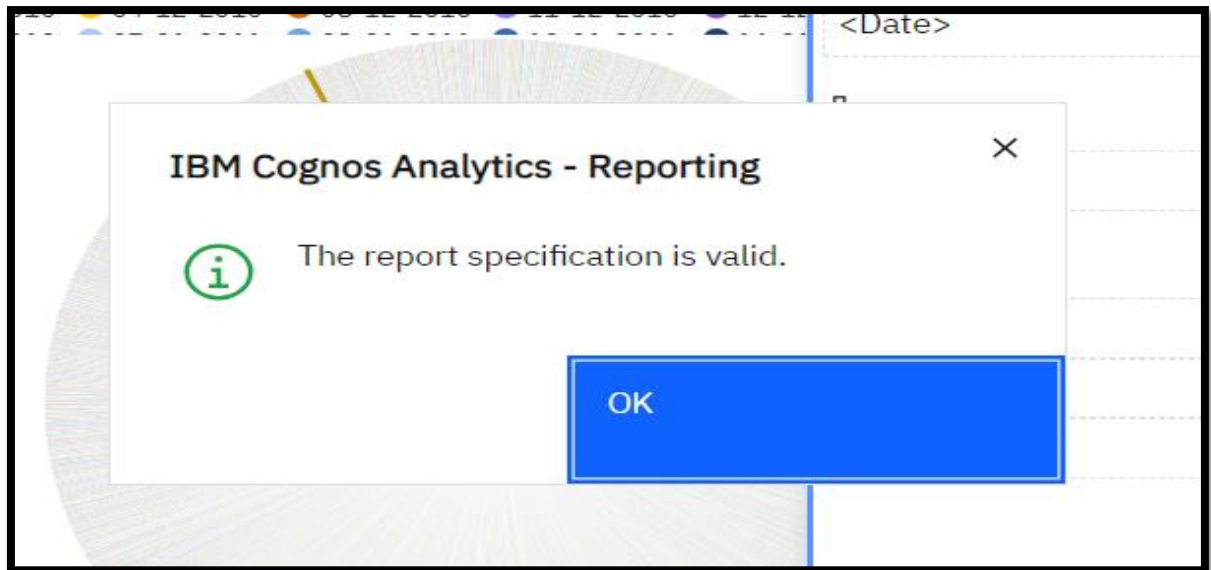

- Q-P4 1168 has the highest Total S-P1 but is ranked #10 in Total S-P4.
- Q-P2 3855 has the highest Total S-P4 but is ranked #7 in Total S-P1.
- Q-P2 1773 has the highest Total S-P1 but is ranked #6 in Total S-P4.
- Q-P1 7910 has the highest S-P1 at over 50 thousand, out of which Q-P4 306 contributed the most at over 25 thousand.
- Q-P3 3646 has the highest Total S-P4 but is ranked #4 in Total S-P1.
- 1163 has a S-P1 of over 25 thousand for Q-P1 7996.
- Across all values of Q-P1 - Q-P2 - Q-P3 - Q-P4, the sum of S-P1 is over 5.7 million.
- S-P1 ranges from 890.8, when Q-P1 - Q-P2 - Q-P3 - Q-P4 is 281|3956|4186|1537, to over 25 thousand, when Q-P1 - Q-P2 - Q-P3 - Q-P4 is 7996|2672|3317|1163.

Interactive dashboards and reports that display insights such as top-selling products, sales trends, and customer preferences.

Top-Selling Products:

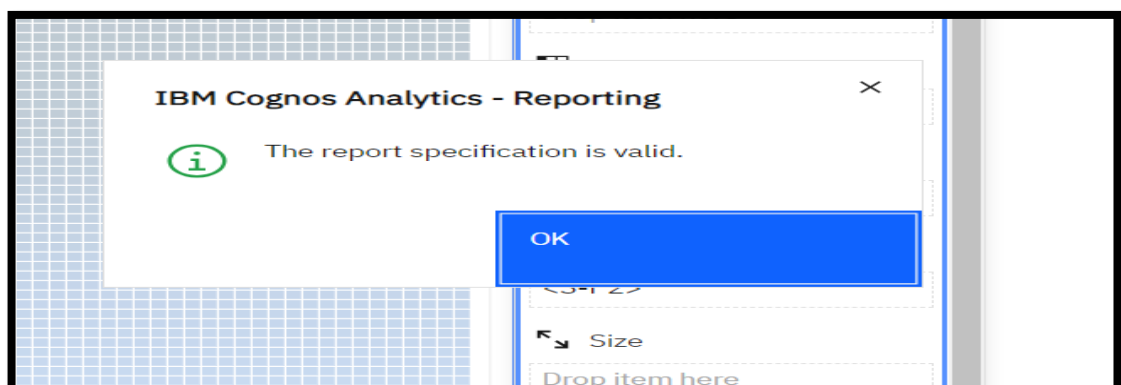

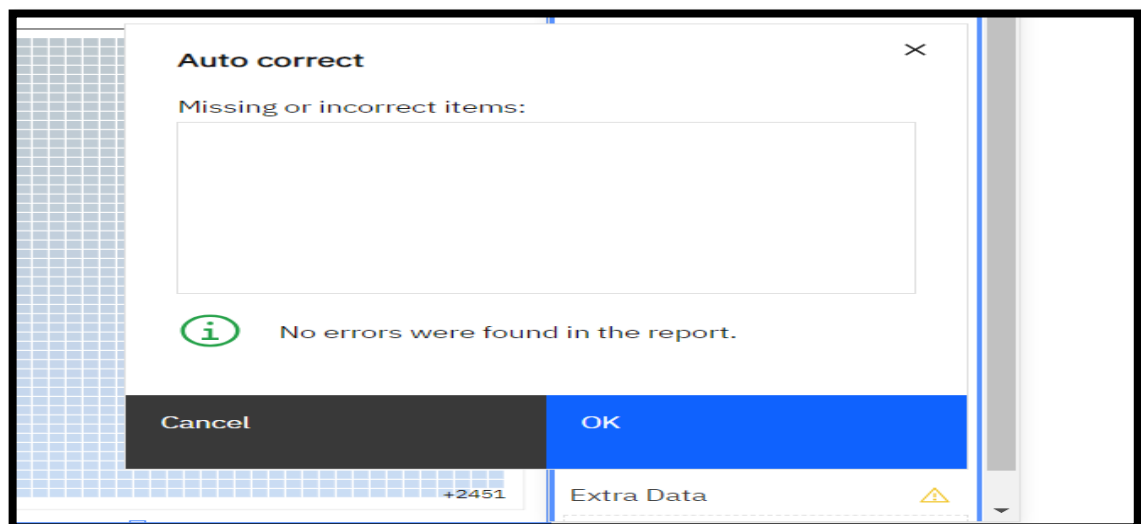

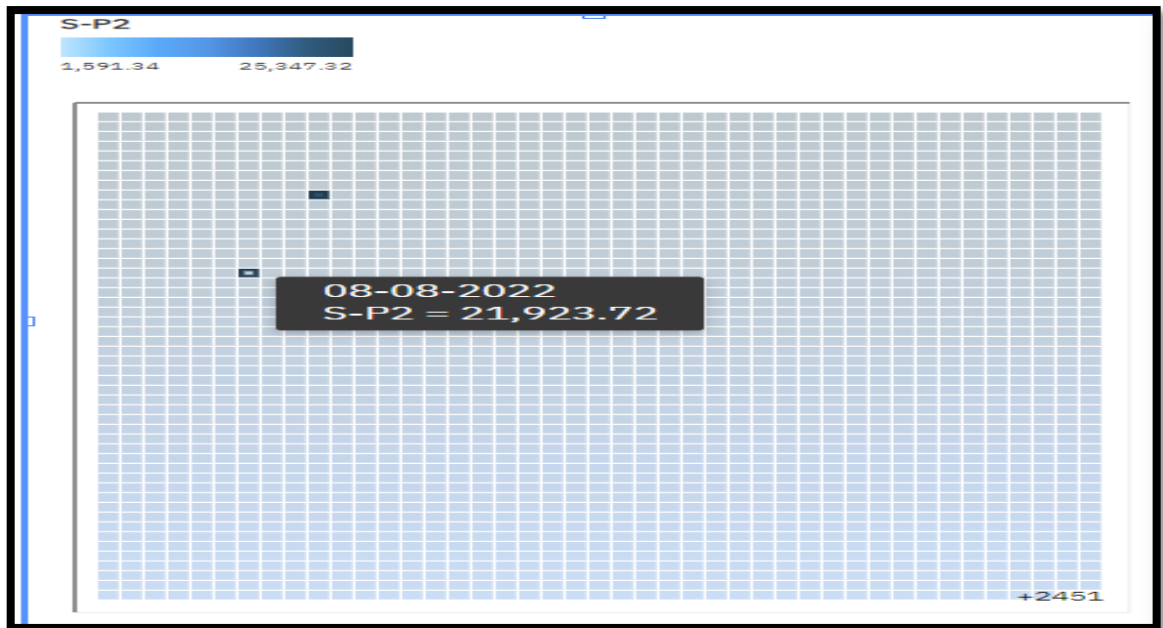

Top-selling products are the items, goods, or services that generate the highest sales revenue within a given time frame. These are the products that consistently perform well in terms of sales and contribute significantly to a company's revenue.

Sales Trends:

Sales trends refer to the patterns, fluctuations, and changes in a company's sales performance over a specified period. These trends can be short-term or long-term and may show increases, decreases, or stability in sales.

Customer Preferences:

Customer preferences represent the choices, likes, and dislikes of customers when it comes to products, services, or experiences. These preferences can encompass various aspects, including product features, pricing, brands, and more.
